

L & L Display Group's Environmental Guide

Our company's commitment to "green"

AUGUST 2008

**7085 N. RIDGEWAY AVE.
LINCOLNWOOD, IL 60712**

L & L Environmental Statement

Over the last 16 years, as LL has worked to grow its business, we have focused on the allocations of our resources, capital, financial and human. As we move along in the 21st century we need to continue managing these resources prudently. However, we need to also efficiently manage the natural resources we both consume and use as raw materials in the manufacture of our products.

As a responsible citizen of this planet we owe it not only to ourselves, but to generations that will come after us. As such the notion of natural resource management is now in the forefront of our strategic decision making, as well as, our operating standards and practices.

**Lee Masover
President
L & L Display Group**

Action Plan

LL has taken an aggressive stand in the prudent management of these resources. We have formed a committee that reviews the operational procedures within our organization relative to the LL “green movement. A representative from each department within company has a seat on the committee. This group reviews topics ranging from product offerings to our clients, operating procedures, and consumable supplies for our office and manufacturing departments. Furthermore, this committee has implemented many of the ideas and strategies in our on going commitment to the “green movement “. Finally this team meets once per quarter to discuss the aforementioned items.

Implementation

Actions implemented to date include:

- Recycling of plastic and corrugated materials.**
- Energy efficient lighting throughout the office and manufacturing spaces.**
- Lowering temperatures in both the office and the plant during winter and summer months.**
- Utilization of fans and exhaust systems**
- Encourage carpooling for workers**
- Use of the propane forklifts only when needed.**
- Phasing out of the propane forklifts for electric forklifts**
- Plastic inner dock doors to seal in cold or heat.**
- Internal paperless reports.**
